

2020 Street Improvement Project

Project Update - October 30, 2020

Project Information

Construction on the 2020 Street Improvement Project was temporarily halted due to snowfall. With the warmer weather and snow melt, the contractor will be back on site next week to finish fall stabilization and clean-up work, as well as manhole casting adjustments and fence installation. In the spring, a warranty inspection of the seeding and restoration will be performed to ensure proper growth, and identify any areas that need to be reseeded. Please note this schedule is weather dependent, subject to change, and will be updated as necessary.

Information about the scope of improvements, frequently asked questions and project contacts are included in this newsletter. As the project progresses, should you have any questions, please reach out to the contacts listed below. During construction, an on-site representative will be present on site each day who will be your first point of contact and fastest way to get an answer for all questions regarding construction. Newsletters will be delivered or emailed weekly, and posted on the City's website as the project progresses to inform property owners of the progress and upcoming construction schedule.

Construction working hours within the City of Mahtomedi are 7am-7pm during weekdays and 8am-5pm on Saturdays. Work is not permitted on Sundays or holidays.

Doorhangers and Email

During the course of construction, the primary method of communication will be as-needed via doorhanger. Please be sure to check your door each day for a bright-colored doorhanger to alert you to items such as the start of construction, possible water shut downs (in specific locations), temporary mail information (in specific locations), and sod or seed information, etc.

Email will also be used to communicate project schedule updates, where the work will be occurring, and upcoming impacts to residents. If you would like to be included on the email list, please send an email to the **Project Engineer, Lydia Ener, at lener@wsbeng.com**.

Project Improvements

The 2020 Street Improvements project involves street, trail, storm, and watermain improvements on Birchwood Road and Lost Lake Court.

It will be the project team's goal to minimize impacts to residents during construction activities, however, no matter how hard we try, construction activities generate dust, noise, and temporary inconveniences. Occasionally, construction will generate vibrations that you may feel within your home. These vibrations do not typically cause problems, however, if you have any questions please contact Dylan Casey.
