

Bevins, Bichner, and Talahi Utility Extension Project Project Newsletter #15– October 2, 2020

Project Information

Construction on the Bevins, Bichner, and Talahi Utility Extension Project continued this week with the placement and grading of aggregate in preparation to pave. The first layer of bituminous will be paved this Saturday, October 3rd. During paving operations, vibratory rollers will be used for compacting the bituminous pavement. These may cause vibrations at your home, but the vibrations will be at safe levels. The roadway will not be closed during paving, but there may be temporary delays. We ask everyone to please drive carefully and following all signs and instructions from the contractor. Please note this schedule is weather dependent, subject to change, and will be updated as necessary.

As the project progresses, should you have any questions, please reach out to the contacts listed below. During construction, an on-site representative will be present on site each day who will be your first point of contact and the fastest way to get an answer for all questions regarding construction. Construction working hours within the City of Mahtomedi are 7am-7pm during weekdays and 8am-5pm on Saturdays. Work is not permitted on Sundays or holidays.

Doorhangers and Email

Email is the preferred method to communicate project schedule updates, where the work will be occurring, and upcoming impacts to residents. This is the quickest and most efficient way to provide you project updates. If you would like to be included on the email list, please send an email to the **Project Engineer, Lydia Ener, at lener@wsbeng.com**.

Door hangers will be used to communicate information for the those properties that for which we don't have an email address. Please be sure to check your door each day for a bright-colored doorhanger to alert you to items such as the start of construction, temporary mail information, and sod or seed information, etc.

Project Improvements

The Bevins, Bichner, and Talahi Utility Extension Project includes the installation of new watermain and sanitary sewer on Bevins Lane and Bichner Lane, and new sanitary sewer on Talahi Drive. The project will also include roadway reconstruction throughout the project area, and storm improvements on Bevins Lane.

It will be the project team's goal to minimize impacts to residents during construction activities, however, no matter how hard we try, construction activities generate dust, noise, and temporary inconveniences. Occasionally, construction will generate vibrations that you may feel within your home. These vibrations do not typically cause problems, however, if you have any questions please contact Dylan Casey.
