

# 2020 Street Improvement Project

Project Update - October 2, 2020

## Project Information

This week, the City's contractor installed the concrete fence bases, and aggregate shouldering. Next week, the fence will be installed along trail adjacent to the wetlands, and the wear course will be paved on Monday. During paving operations, vibratory rollers will be used for compacting the bituminous pavement. These may cause vibrations at your home, but the vibrations will be at safe levels. The roadway will not be closed during paving, but there may be temporary delays. We ask everyone to please drive carefully and following all signs and instructions from the contractor. Please note this schedule is weather dependent, subject to change, and will be updated as necessary.

Information about the scope of improvements, frequently asked questions and project contacts are included in this newsletter. As the project progresses, should you have any questions, please reach out to the contacts listed below. During construction, an on-site representative will be present on site each day who will be your first point of contact and fastest way to get an answer for all questions regarding construction. Newsletters will be delivered or emailed weekly, and posted on the City's website as the project progresses to inform property owners of the progress and upcoming construction schedule.

Construction working hours within the City of Mahtomedi are 7am-7pm during weekdays and 8am-5pm on Saturdays. Work is not permitted on Sundays or holidays.

## Contacts

### **Dylan Casey**

On-Site Representative  
612-283-7466

### **Lydia Ener**

Project Engineer  
763-270-3464  
lener@wsbeng.com

### **Nick Guilliams**

Project Manager  
651-286-8468

### **Bob Goebel**

Public Works Director  
651-773-9730

## Doorhangers and Email

During the course of construction, the primary method of communication will be as-needed via doorhanger. Please be sure to check your door each day for a bright-colored doorhanger to alert you to items such as the start of construction, possible water shut downs (in specific locations), temporary mail information (in specific locations), and sod or seed information, etc.

Email will also be used to communicate project schedule updates, where the work will be occurring, and upcoming impacts to residents. If you would like to be included on the email list, please send an email to the **Project Engineer, Lydia Ener**, at **[lener@wsbeng.com](mailto:lener@wsbeng.com)**.

## Project Improvements

The 2020 Street Improvements project involves street, trail, storm, and watermain improvements on Birchwood Road and Lost Lake Court.

It will be the project team's goal to minimize impacts to residents during construction activities, however, no matter how hard we try, construction activities generate dust, noise, and temporary inconveniences. Occasionally, construction will generate vibrations that you may feel within your home. These vibrations do not typically cause problems, however, if you have any questions please contact Dylan Casey.
